

## Merritt Service Update: December 2014

merritt.cdlib.org

### Recent Enhancements, News, and Activities

- Trisha Cruse, UC3 Director, has retired from CDL after 20 years of service in UC including her previous position at UCSD. Trisha was the original director of the Digital Preservation Program and UC3, and she oversaw the development of our services, including the Digital Preservation Service (DPR) and its successor, Merritt. More information on her career can be found here: <http://www.cdlib.org/cdlinfo/2015/01/12/patricia-cruse-cdl>.  
We wish her the best!
- We are making an extra copy of all the Merritt content stored in the UCOP data center before we start replicating the data from SDSC to UCLA. We need to repurpose the storage in the UCOP Data Center for other services, but want to have a copy of the Merritt content while we verify that everything was migrated. All of our tests so far indicate that everything was moved successfully.

### Merritt Service Description

Merritt is a production level service that provides the UC community with an easy to use tool to manage, archive, and share their content. Content can be deposited and managed via a user-interface or an API.

### Merritt Service Manager

- Perry Willett [perry.willett@ucop.edu](mailto:perry.willett@ucop.edu)

Please send any questions or general correspondence to [uc3@ucop.edu](mailto:uc3@ucop.edu).

### Training Materials, Guides, FAQs and Webinars

More information about Merritt is available at <http://www.cdlib.org/services/uc3/merritt> or by sending an inquiry to [uc3@ucop.edu](mailto:uc3@ucop.edu).

### Service Monitoring and Availability

Check the Merritt system status page at <http://www.cdlib.org/contact/system.html>.
